

THE SERVICE PACKAGE FOR YOUR WEBSITE

With the Domain Name Service (DNS), the Telekom is offering a comprehensive and affordable service package centred round the start and support of your good name on the Internet.

DOMAIN NAME SERVICE: MAKING YOU EASY TO FIND

Our DNS offer provides everything you need for your domain name on the Internet.

This service includes:

- Competent support in starting up a new website
- Transfer and changing of domain names
- Customised domain name (e.g. under a top-level domain [TLD])
- Transfer of the registration and support of your domain

Transparent prices and fair calculations are characteristic of our Domain Name Service. With the Telekom, you only pay for the services that you truly need and desire.

As an ICANN (Internet Corporation for Assigned Names and Numbers) registrar, we can reserve a number of country-specific TLDs for you (such as .de, .at, .ch and .dk), generic TLDs (such as .com, .net, .org and .info) or generic domains (such as .co.uk, .org.uk and .co.at).

On request, we can also take on the technical DNS operation of your domain. Whether you need a primary or secondary domain name, our offer can be customised to your precise wishes.

ERLEBEN, WAS VERBINDET.

DOMAIN NAME SERVICE

AN EXCERPT FROM OUR PRICE LIST:*
