T Connecting your world.

The new dimension of collaboration – on all devices

Telephone **Meetings** **Messaging** **Security**

CompanyFlex Cloud PBX 2.0 is the customized all-in-one solution for the communication of businesses of all sizes: For **telephone calls, audio and video meetings in top quality,** as well as modern **chat and messaging functions – now also with protection against the dangers of cybercrime[1].** Teams, customers, and partners are always perfectly connected, **at any place and at any time.**

Connecting to the future

Cloud PBX provides all the functions of a professional telephone system from the cloud **– and a modern system is also available for digital collaboration.** You can easily add workstations and applications online. Your communication system grows with your business without you having to invest in a new system at every location!

Connection, rate, cloud telephone system, and tools for collaboration

- Book workstations online and use them immediately
- Webex basic package for video conferences and chat included
- Additional functions like group function, assistance function, etc. can be added individually as required
- One number for fixed network and mobile communications
- Network-based address book for private and public contacts
- Network-based voice mailbox: Always informed in the office and on the go

- IP-based connection with individual numbers or phone number blocking and flexible phone number management
- Two parallel calls included, max. 998 more can be added on
- Fault clearance within a maximum of 8 hours[3]
- Protection from cybercrime threats[1] – without administrative effort or downloads
- Fixed IP address
- Free internal calls between all the locations

With MagentaEINS Business Integration

- Use telephone system functions on your smartphone
- Stay reachable and make calls using the fixed network number even when on the go
- Correct availability display continuously even for mobile calls
- Direct access to network-based address books
- Seamless call transfer to and from the smartphone

Efficient teamwork directly
Seamless online meetings from the cloud

Avoid email chains and cumbersome file storage: CompanyFlex Cloud PBX 2.0 includes comprehensive functions for your online meetings based on Webex by Cisco. Colleagues, customers, and business partners can collaborate securely and quickly in real-time from any location, with any device.

High-performance and always included: Professional web conferences

- Comprehensive conference functions for scheduling video conferences with up to 100 participants
- For meetings lasting up to 40 minutes
- 2 GB cloud storage
- Personal meeting space with fixed dial-in link

- 20 GB cloud storage
- Delegate to co-hosts, e.g., conference scheduling
- AI-supported Webex assistant, e.g., for live translations
- ·Remote desktop control
- Moderator function
- Meeting livestream on YouTube or Facebook

Includes desktop, mobile, and tablet app

One contract, all options
Communication based on your needs

With CompanyFlex Cloud PBX 2.0 you don't take any risks, because this communication solution adapts to your business, not the other way around. You set up the services that you really need, and pay only for what you actually use. Additional applications, such as the assistance function, group function, or conference packages can be easily added or removed at any time online in the self-administration portal.

**CompanyFlex
Cloud PBX 2.0**

from **53,90 €**[4] per month,
including fixed network

All prices are net plus statutory VAT.
1) Security OnNet Basic is a service from the Telekom network. It enables the automated blocking of websites that have been identified as risky. The risk that such a website can be accessed despite the option being activated cannot be ruled out. Security OnNet Basic is already included with CompanyFlex. The option cannot be used with 5G Mobile Backup activated. **2)** Surf and call all Telekom customers in a green network operated with up to 100 % renewable energy regardless of the rate used. **3)** This does not apply to connections in optical fiber cooperation areas. You can find out whether your connection is in a cooperation area by using the availability check at www.telekom.de/glasfaser. **4)** The price consists of the basic package CompanyFlex Flat at € 26/month, the location product CompanyFlex Complete MSN at € 24.95/month, and at least one workstation at € 2.95/month each. (Sliding scale prices). The minimum contract period for CompanyFlex Flat is 2 years, with a notice period of 1 month. The minimum contract period for CompanyFlex Complete is 1 month, with a notice period of 6 days. An offer from: Telekom Deutschland GmbH, Landgrabenweg 149, 53227 Bonn.
